

GAS DELIVERY REGULATOR 1/4" - 1" NPT, BSPT

Spring Reference & Pilot Operated Inlet 550 Psig (38 Bar)

STANDARD CONFIGURATION

PILOT OPERATED (DOME LOADED)

PANEL MOUNTED

PIPE-A-WAY CHAMBER

Description

The GDR Series Regulator provides reliable, precise pressure control in the most demanding applications. Optimized Venturi and spring design assures high flow with extremely low droop characteristics. Solid non-tied diaphragm and all brass construction guarantees leak free long lasting performance. Fully balanced design virtually eliminates outlet pressure fluctuations due to inlet pressure variations. All GDR Series regulators are 100% factory tested, cleaned and packaged for oxygen service.

Features

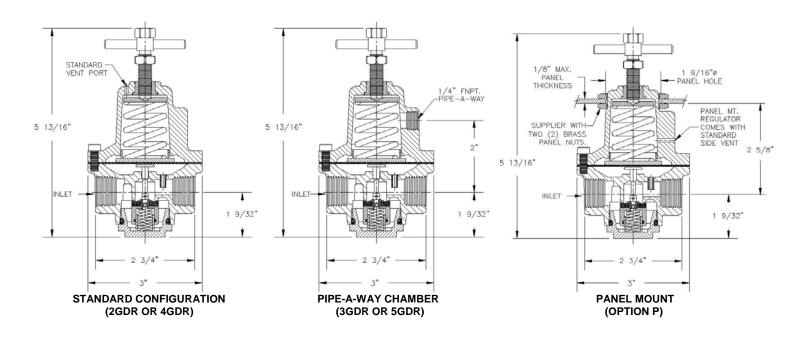

- Fully Balanced Design maintains a constant delivery pressure regardless of inlet pressure fluctuations
- Fully Supported, Solid Non-Tied Diaphragm for long leak free service life
- Flow Rates to 20,000 SCFH
- Optimized Spring Design and Unique Venturi Tube allows for high flow rates with minimal pressure droop effect
- Pilot Operated (dome loaded) Configuration maintains virtually constant outlet pressures
- Vent Chamber to Stack with Pipe-a-Way Option
- Side Venting Chamber option prevents moisture accumulation when mounted horizontally
- Cleaned and Packaged for Oxygen Service

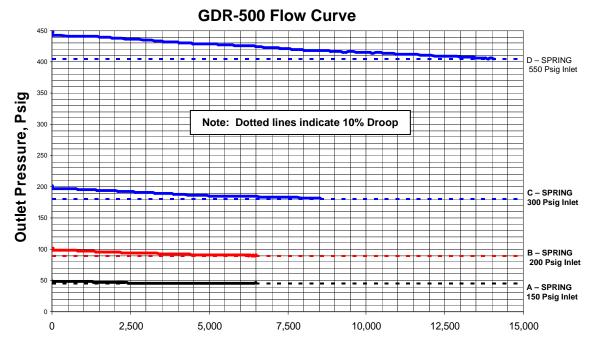

Materials of Construction

- Forged Brass Body and Spring Chamber **ASTM 377**
